|--------------------------------------------------------------------------------------------------------------------|-----------|
| ACKNOWLEDGMENTS .....                                                                                              | V         |
| <b>Chapter 1. Introduction to Water Law .....</b>                                                                  | <b>1</b>  |
| A. Overview of This Book.....                                                                                      | 1         |
| B. The Aquatic Cycle and Basic Concepts of Hydrology .....                                                         | 3         |
| C. Water Use in the United States and Globally .....                                                               | 5         |
| D. Water Quality and Aquatic Ecosystem Health.....                                                                 | 8         |
| E. Climate Change and Water Resources in the United States.....                                                    | 9         |
| F. The Emerging Human Right to Water.....                                                                          | 14        |
| <b>Chapter 2. Riparian Law.....</b>                                                                                | <b>17</b> |
| A. Defining Riparian Property and Riparian Rights .....                                                            | 17        |
| 1. The Importance of a Water Boundary .....                                                                        | 17        |
| 2. Riparian Rights in Artificial Waterways .....                                                                   | 18        |
| 3. Division and Boundaries of Submerged Land .....                                                                 | 19        |
| 4. Conveyances of Riparian Rights .....                                                                            | 22        |
| 5. Rights Regarding Diffuse Flow and Runoff .....                                                                  | 24        |
| B. The Riparian Right to Take and Use Fresh Water .....                                                            | 26        |
| 1. The Natural Flow Rule and the Transition to<br>Reasonable Use .....                                             | 26        |
| 2. Legal Development of the Reasonable Use Factors.....                                                            | 28        |
| 3. The Restatement (Second) of Torts § 850.....                                                                    | 29        |
| 4. Accommodating Public Water Suppliers Under Riparian<br>Law .....                                                | 30        |
| C. Riparian Rights Beyond Consumptive Use .....                                                                    | 32        |
| 1. The Right to Wharf Out .....                                                                                    | 33        |
| 2. The Right to Access the Water.....                                                                              | 34        |
| 3. The Right to Use the Entire Surface of the Waterbody<br>for Boating, Fishing, and Recreation.....               | 35        |
| 4. The Doctrines of Accretion, Reliction, and Avulsion .....                                                       | 36        |
| 5. The Right to an Unobstructed View .....                                                                         | 38        |
| 6. Right to Water of a Certain Quality .....                                                                       | 38        |
| <b>Chapter 3. Dealing with Western Water Realities: The<br/>Creation and Adoption of Prior Appropriation .....</b> | <b>39</b> |
| A. Introduction .....                                                                                              | 39        |
| B. The Basic Concepts of Prior Appropriation .....                                                                 | 41        |
| 1. Divergence from Riparian Rights .....                                                                           | 41        |
| 2. First in Time, First in Right .....                                                                             | 43        |
| 3. Use It or Lose It .....                                                                                         | 47        |
| C. The Elements of Prior Appropriation.....                                                                        | 48        |
| 1. Diversion or Other Notice .....                                                                                 | 48        |
| 2. Unappropriated Water .....                                                                                      | 50        |
| 3. Sources Subject to Appropriation .....                                                                          | 52        |
| 4. Beneficial Use .....                                                                                            | 54        |
| D. The Three Main Variations on Prior Appropriation<br>Doctrine .....                                              | 57        |
| 1. The Colorado Doctrine.....                                                                                      | 58        |

|                                                                                                            |                                                                                            |     |
|------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|-----|
| 2.                                                                                                         | The California Doctrine .....                                                              | 59  |
| 3.                                                                                                         | The Oregon Doctrine .....                                                                  | 60  |
| <b>Chapter 4. Allocating Groundwater: The Five Groundwater Doctrines Used in the United States..... 63</b> |                                                                                            |     |
| A.                                                                                                         | Introduction .....                                                                         | 63  |
| 1.                                                                                                         | A Brief Primer on Hydrogeology (Groundwater Hydrology) .....                               | 63  |
| 2.                                                                                                         | From Groundwater Science to Groundwater Law .....                                          | 65  |
| B.                                                                                                         | Common-Law Groundwater Doctrines .....                                                     | 68  |
| 1.                                                                                                         | Rule of Capture .....                                                                      | 69  |
| 2.                                                                                                         | American Reasonable Use .....                                                              | 70  |
| 3.                                                                                                         | Correlative Rights .....                                                                   | 72  |
| 4.                                                                                                         | Restatement (Second) of Torts .....                                                        | 73  |
| 5.                                                                                                         | Prior Appropriation .....                                                                  | 75  |
| C.                                                                                                         | Managing Groundwater-Surface Water Interactions .....                                      | 76  |
| <b>Chapter 5. Moving from the Common Law to Permits..... 81</b>                                            |                                                                                            |     |
| A.                                                                                                         | Introduction .....                                                                         | 81  |
| B.                                                                                                         | Changing to a Permit System: What Happens to the Already-Existing Common-Law Rights? ..... | 83  |
| 1.                                                                                                         | General Stream Adjudications .....                                                         | 84  |
| 2.                                                                                                         | Permit Conversion .....                                                                    | 87  |
| C.                                                                                                         | The Adoption of Water Permitting Systems: West Versus East.....                            | 89  |
| 1.                                                                                                         | Permit Programs in Western Prior Appropriation States .....                                | 89  |
| 2.                                                                                                         | Permit Programs in Riparian Jurisdictions .....                                            | 91  |
| D.                                                                                                         | New Substantive Requirements Created in Water Permit Statutes .....                        | 94  |
| 1.                                                                                                         | Public Interest Requirements .....                                                         | 94  |
| 2.                                                                                                         | Water Availability Considerations or Protection of Minimum Flows and Levels .....          | 97  |

| 4. The Colorado River Compact .....                                                    | 191        |
| D. Congressional Apportionment of Water.....                                           | 195        |
| <b>Chapter 10. The Water-Energy Nexus.....</b>                                         | <b>199</b> |
| A. Introduction .....                                                                  | 199        |
| B. Water Use in the Production of Energy .....                                         | 200        |
| C. Regulating Hydropower Production .....                                              | 208        |
| D. Energy Use in Water Management.....                                                 | 212        |
| E. Using Energy to Produce Water: Desalination.....                                    | 215        |
| F. Climate Change and the Water-Energy Nexus .....                                     | 218        |
| <b>Chapter 11. The Intersection of Water Law and Water Pollution Control Law .....</b> | <b>221</b> |
| A. Introduction .....                                                                  | 221        |
| B. Common Law Doctrines Governing Water Quality .....                                  | 222        |
| 1. Riparian Rights.....                                                                | 223        |
| 2. Prior Appropriation .....                                                           | 225        |
| 3. Nuisance Law.....                                                                   | 226        |
| C. Intersection of the Clean Water Act and Water Law .....                             | 228        |
| 1. Core Concepts of the Clean Water Act .....                                          | 228        |
| 2. Connections Between the CWA and Water Law .....                                     | 234        |
| a. CWA Regulation of Water Use Infrastructure.....                                     | 234        |
| b. Water Law and Water Quality Standards .....                                         | 237        |
| c. Water Law and Technology-Based Pollution Control .....                              | 241        |
| D. Federalism and the Intersection of Water Quality and Water Quantity.....            | 242        |
| <b>Chapter 12. Human Use of Water and Endangered Species .....</b>                     | <b>249</b> |
| A. Introduction .....                                                                  | 249        |
| B. The ESA's Purposes and Goals .....                                                  | 251        |
| C. Listing Species for Protection Under Section 4 .....                                | 257        |

|    |                                                                |     |
|----|----------------------------------------------------------------|-----|
| D. | Section 7: Protection of Species from Federal Activities ..... | 264 |
| 1. | Section 7's Two Requirements for Federal Agencies .....        | 264 |
| 2. | Section 7(a)(2)'s Consultation Process .....                   | 266 |
| 3. | The Requirement of Agency Discretion .....                     | 267 |
| 4. | Applying Section 7(a)(2) to Federal Water<br>Management .....  | 268 |
| E. | Section 9: Protection Against "Takes" .....                    | 275 |

### **Chapter 13. Comprehensive Water Resources**

|    |                                                                                 |            |
|----|---------------------------------------------------------------------------------|------------|
|    | <b>Management and Watershed Planning .....</b>                                  | <b>283</b> |
| A. | Introduction: Imperatives for Comprehensive Approaches ...                      | 283        |
| B. | Existing Legal Tools to Protect Aquatic Ecosystem<br>Values .....               | 286        |
| 1. | Using Traditional Water Law to Protect Instream<br>Flows and Ecosystems .....   | 286        |
| 2. | Using Water Pollution Law to Address Water Quantity<br>Problems .....           | 290        |
| C. | Institutional Mechanisms to Promote Comprehensive<br>Watershed Management ..... | 293        |
| 1. | Comprehensive Watershed Programs .....                                          | 293        |
| 2. | Adaptive Management .....                                                       | 298        |
| 3. | An International Perspective: Integrated Water<br>Resources Management .....    | 302        |

### **Chapter 14. Public Interests, Private Rights in Water, and Constitutional Taking Claims.....305**

|    |                                                                                                       |     |
|----|-------------------------------------------------------------------------------------------------------|-----|
| A. | Overview of Taking Law .....                                                                          | 305 |
| 1. | Taking Under the U.S. Constitution .....                                                              | 305 |
| 2. | Taking Claims Under State Constitutions .....                                                         | 307 |
| 3. | The U.S. Court of Federal Claims and the U.S. Court<br>of Appeals for the Federal Circuit .....       | 308 |
| B. | Defining the Property Right: What Exactly <i>Is</i> a Water<br>Right? .....                           | 309 |
| 1. | Inherent Limitations on Water Rights .....                                                            | 309 |
| 2. | Defining Riparian Rights in Federal Taking Litigation:<br>An Example from Florida .....               | 310 |
| 3. | Defining Prior Appropriation Rights in Federal Taking<br>Litigation: An Example from California ..... | 312 |
| 4. | Is State Certification a Better Procedure for Defining<br>State Water Rights in Federal Courts? ..... | 314 |
| C. | Physical Versus Regulatory Takings of Water Rights .....                                              | 318 |
| 1. | Physical Takings of Water Rights .....                                                                | 318 |
| 2. | The Regulatory Taking Analysis and Water Rights .....                                                 | 322 |
| D. | Calculating the Compensation Owed When a<br>Constitutional Taking of a Water Right Has Occurred ..... | 327 |
| E. | Conclusion .....                                                                                      | 329 |
|    | TABLE OF CASES .....                                                                                  | 331 |
|    | INDEX .....                                                                                           | 337 |
